

**UNIVERSITY OF
GEORGIA**

**Franklin College of
Arts and Sciences**
Department of Anthropology
Laboratory of Archaeology

To Be Filled out by Laboratory Personnel:

Researcher:

Site Name/Collection (s):

Consultation Completed: Yes No

Research/Access Request Approved: Yes No

CONSULTATION FORM

The Laboratory of Archaeology requires consultation and the completion of this form for all research and access for **UGA controlled collections**. Additionally, other agencies control some collections curated by the Laboratory and approval of research on those collections must come from the agency that controls that collection(s). Some agencies might require the completion of this form prior to approving research. We recommend that researchers engage in consultation early on in projects to give communities the time they need to consider research. The Laboratory requires the completion of this form along with other forms depending on the type of research before research access is granted (e.g., initial research request, collection access and use agreement, loans, transfers, destructive analysis, and image permission, etc.). The Laboratory also requires copies of data, reports, publications, presentations, imagery, etc. produced as a result of this research to be sent to the Laboratory and descendant communities that were consulted on.

This form can be used to initiate consultation with descendant communities. Please complete this form and email separate copies to appropriate descendant communities for review and comment. Please see list of affiliated tribes to Georgia for information on contact information and geographic areas of affiliation.

Email completed form to Operations Director, Amanda Roberts Thompson arobthom@uga.edu.

Advisor (if student researcher):

Email:

Research Title (if available):

Site Name (s) or/Collection Name (s):

Site Number (s):

Additional Notes about Site or Collection:

Please provide a brief overview of anticipated project or add research proposal to end of form:

Please list the types of analysis that would occur on object (s) within this collection (s) during the proposed research:

Does your research involve destructive analysis? Yes No

If so, what will be sampled, how much, and will there be any remaining materials to be sampled in the future?

Note: you must also complete the Laboratory's Destructive Analysis Form if destructive analysis is approved.

Are any of the contexts you plan to examine/sample contain ancestors or objects that would fall under NAGPRA—either as formal burials, cremations, or single elements or objects? Yes No

If yes, how closely associated are the ancestral remains to your proposed research? For example, your request may be to look at ceramics from an excavated house; however, this house may have an ancestor buried in its floor. In this case, there is an association that should be documented even if the research avoids the ceramics buried with the ancestor.

Please outline the contexts below and attach a map of site excavations and proposed contexts to assist tribal representatives and descendant community members in understanding research.

What value is this research to descendant communities?

Please list out contact information for tribal representative (s) or descendant community members who were contacted:

This Section to Be Filled out by Tribal Representative (s) or Descendant Community Members Only:

Do you approve of the proposed project/research? Yes No

Yes (with incorporation of suggestions below)

Suggestions for Researcher and proposed project/research (pdf of letter or email from tribes can be attached here also):

Specific comments and concerns (pdf of letter or email from tribes can be attached here also):
